

## Mantis 2534

### Connecting generic interfaces

In Section **25.3.3 Interface example using a generic bundle**

CHANGE

An implicit port cannot be used to reference a generic interface. A named port shall be used to reference a generic interface, as follows:

TO

~~An implicit port cannot be used to reference a generic interface. A named port shall be used to reference a generic interface, as follows:~~

A generic interface shall not be connected using an implicit `.name` or `.*` port connection (see 23.2.2.3, 23.2.2.4). The interface connected to the generic interface port shall be explicitly specified in a port connection by ordered list or by name (see 23.2.2.1, 23.2.2.2).

Example:
