CH-34 I don't like "singular", it doesn't convey any useful meaning for me used in this context. (Kevin)

CH-34 A description of what singular means. I would like to see the definition of singular. I also don't like this name. (Francoise)

CH-36 I would like to see a different definition for compatibility: 2 arrays are assignment compatible iff the element type of each array can be assigned the number of elements in the array is the same? (Francoise)

CH-39 If we are going to change it from a task, then the following paragraph needs to be changed from "the task issues no warning" to "the function issues no warning" (or "the method issues no warning") Resolved in CH-70. (Stefen). Stefen changed his vote on the creation of CH-70.
