

**Modify the last paragraph in section 5.5 FROM:**

Note that automatic or dynamic variables cannot be used to trigger an event expression or be written with a nonblocking assignment. Automatic variables and dynamic constructs—objects handles, dynamic arrays, associative arrays, strings, and event variables—are limited to the procedural context.

**TO:**

Note that automatic or dynamic variables cannot be written with nonblocking or continuous assignments. Automatic variables and dynamic constructs—objects handles, dynamic arrays, associative arrays, strings, and event variables—are limited to the procedural context.
